Manufacturing News Magazines.
November 2010

Global Tooling Solutions and Gator Chucks have introduced a comprehensive line of 4 jaw independent chucks with semi-steel, cast steel and forged steel bodies.

Gator Independent chucks are available with plain-back as well as A&D direct mounts. Special fully machined and semi-finished adaptors allow the end-user to cover all of the most popular mounting options including L type spindles. Gator 4 jaw independent chucks are provided with a set of solid reversible jaws or with 2 piece American National Standard tongue and groove jaws. 2 piece ANSI standard jaws give the end-user the flexibility to use any other ANSI standard or special hard or soft-top jaws. These precision chucks are available in diameters from 3" thru 50".

Gator has announced the addition of an Oil Country Chuck line to its Independent Chuck family. High quality 4 Jaw independent Heavy Duty Oil Country lathe chucks with solid forged steel bodies are available with A2 mounts. Chuck diameters are 20", 25", 28" and up.
