Manufacturing News Magazines.
August 2010

Global Tooling Solutions has announced the addition of Heavy Duty Oil Country Chucks to the company's Gator Forged Steel Body Chuck family. These 4 jaw independent chucks are produced with solid forged steel bodies and are available with A2 mounts in 20-40 inch diameters.

HD Oil Country Chucks are designed as an addition to the Gator steel body chuck family. Our forged steel body chucks are dedicated to finishing, medium duty and heavy duty machining applications. This group includes high precision 3 and 6 jaw adjustable scroll chucks with the diameters from 4-25 inches, Precision 3 and 4 jaw scroll chucks with diameters from 3-32 inches and Precision Large Thru Hole scroll chucks with diameters from 16-26 inches. All Gator steel body chucks are available with the most popular spindle mounts and are stocked in our U.S. warehouse.

Gator Chucks are produced with certified forged steel guaranteeing high rigidity and gripping power, high accuracy, repeatability and long life and the ability to run these chucks at higher speeds.

Gator forged steel body chucks are provided with 2 piece American National Standard tongue and groove jaws. ANSI standard jaws are designed to give the end user the flexibility to use any other ANSI standard or special Hardor Soft top jaws. The accuracy of all Gator chucks exceed DIN runout requirements. All mounting dimensions meet DIN and ANSI standard requirements. Plain back chucks can be mounted with all adapters (A, D, C, L and threaded) meeting DIN6350 requirements.
